Sharpak HYDRI COMPACT, 18 and 35 PLUS sharps containers

In line with the publication of the Department of Health Technical Memorandum HTM-07-01 titled "The Safe Management of Healthcare Waste" we will continue to offer the Sharpak HYDRI range sharps containers which already conforms to the new colour code recommendations as detailed in the new guide.

All Code PURPLE Sharpak HYDRI sharps containers feature PURPLE coloured closures and labels and are recommended for the segregation, collection and disposal of sharps waste which are contaminated with cytotoxic or cytostatic medicines,

Code PURPLE Sharpak HYDRI sharps containers MUST only be disposed of by incineration

All Code PURPLE Sharpak HYDRI sharps containers are approved to ISO 23907:2019 and tested and certified in accordance with the provisions of the United Nations recommendations on the Transportation of Dangerous Goods, Chapter 9, UN3291 Clinical Waste, Unspecified, NOS.

The majority of drug manufacturers do not mark their products with the appropriate packaging group classifications, thereby leaving medical staff to decide how to safely dispose of their contaminated sharps.

What's more, when different drug types are used in the clinical environment, it is a certainty that a cocktail of drugs will result, making a correct assessment of their classification even more difficult

The Code PURPLE range of Sharpak HYDRI containers are each supplied with a special HYDRI mat which safely absorbs any free fluid which accumulates in the bottom of the container thereby preventing any spillage during use, transportation and disposal.

MANUFACTURED, TESTED AND CERTIFIED TO ISO 23907:2019

UN TYPE TESTED
